Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

US-09-554-929-1/C
is Sequence 1, Application US/09554929
patent No. 6521427
general information
if APPLICANT: Evans, Glen A.
TITLE OF INVENTION: A Method for the Complete Chemical
TITLE OF INVENTION: Synthesis and Assembly of Genes and Genomes
FILE REFERENCE: P-EA 4749
CURRENT FILING DATE: 2000-05-12
NUMBER OF SEQ ID NOS: 193
SOFTWARE: FastSEQ for Windows Version 4.0
ISEQ ID NO
SEQ ID NO
ILENGTH: 4800
TYPE: DNA
ORGANISM: Artificial Sequence
                                                                                                                                                                                                                                                                                                                                              DB 4; Length 4800;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Aceeeercreacecreaceaaceaaacreacerraacearriraecacriricareacarra 8014
REFERENCE/DOCKET NUMBER: 2549
TELECPHONICATION INFORMATION:
TELEPHONE: 801531918
TELEPHONE: 801531918
TELEPHONE: 801531918
TELEPHONE: ROLES IN NO: 6: SEQUENCE CHARACTERISTICS:
LENGTH: 8797 base pairs
TYPE: nucleic acid
STRANDEDNESS: double
TOPOLOGY: not relevant
MOLECTLE TYPE: other nucleic acid
DESCRIPTION: taurus beta casein 5' regulatory region plus genes encoin the parameter of the casein 5' regulatory region plus genes in TYPE: maphipathic peptide and green fluorescent protein"
HYPOTHETICAL: YES
MATI-SENSE: NO

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Š
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        TELEFAX: 8015319168
INFORMATION FOR SEQ ID NO: 5:
SEQUENCE CHARACTERISTICS:
LENGTH: 11093 base pairs
TYPE: nucleic acid
STRANDEDNESS: double
TOPOLOGY: not relevant
MOLECTLE TYPE: other nucleic acid
DESCRIPTION: 'desce "Construct comprising
DESCRIPTION: portions of Bos raurus beta casein gene and genes encoding
DESCRIPTION: amphipathic peptide and green fluorescent protein"
HYPOTHETICAL: YES
ANTI-SENSE: NO
FRATURE:
NAME/KEY: excn
LOCATION: 1801..1834
OTHER INFORMATION: /product= "beta casein excn 1"
Sequence 5, Application US/08723306
Patent No. 5856178
GENERAL INFORMATION
APPLICANT: White PhD, Kenneth
APPLICANT: White PhD, John
APPLICANT: White PhD, John
APPLICANT: Reed, William
TITLE OF INVENTION: Pegitides in Mammalian Transgenic Organisms
NUMBER OF SEQUENCES: 32
CORRESPONDENCE ADDRES: 32
CONDUTER: D. Box 2250

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
